

Statement

Alumast Inc. which is a manufacturer of lighting poles including poles with passive safety features that meet the requirements of PN-EN 12767 standard declares that it is in the process of certification of lighting poles for categories 100.LE.3 and 100.HE.1

Currently, field tests have been successfully completed at the accredited testing laboratory of PIMOT in Warsaw, which is confirmed in test reports.

Based on the crash test reports, the certification body will extend our current certificate to include the poles tested. The certification extension should be completed in late July/early August of this year.
